

## ArcelorMittal Europe Tubular Products

➡ ArcelorMittal Europe Tubular Products is a pan-European producer and leading global supplier of pipes and tubes. With manufacturing operations in five countries, 13 strategically located production sites, and a robust distribution network, we deliver our comprehensive range of tubular products across Europe and major international markets. Active in many sectors like energy, construction, automotive, mechanical engineering, yellow and green goods, and agriculture,

we offer an extensive portfolio of tubular solutions that cover the full spectrum of customer needs. ArcelorMittal Europe Tubular Products stands at the forefront of the industry, offering one of the widest ranges of steel solutions available. Our product range includes seamless and small welded tubes (including precision and CDW), complemented by various processes and finishing options such as ERW, HFI, galvanized, coated laser cutting, and tube bending.

## Climate Action

➡ Our journey towards becoming carbon neutral by 2050 is well underway. In line with the Paris Climate Goals and the European Green Deal, ArcelorMittal has also committed to reduce CO<sub>2</sub> emissions in our European operations by 35% by 2030. As Europe's largest steelmaker, ArcelorMittal has a significant role to play in enhancing the sustainability of our industry. Our decarbonisation strategy has three main levers: Circular steel, Innovative Direct Reduced Iron (DRI), and Smart Carbon steelmaking. There are projects underway for all three of these levers to

ensure we achieve our goals on schedule. In 2021, we launched XCarb®. This initiative groups together all of ArcelorMittal's low carbon steelmaking activities, projects and products. Our industry-first XCarb® green steel certificates allow customers to reduce their Scope 3 emissions, and are the result of decarbonisation efforts in our blast furnace operations. XCarb® recycled and renewably produced is applied to steels produced in ArcelorMittal's electric arc furnaces (EAFs) with 100% renewable electricity and up to 100% scrap content.

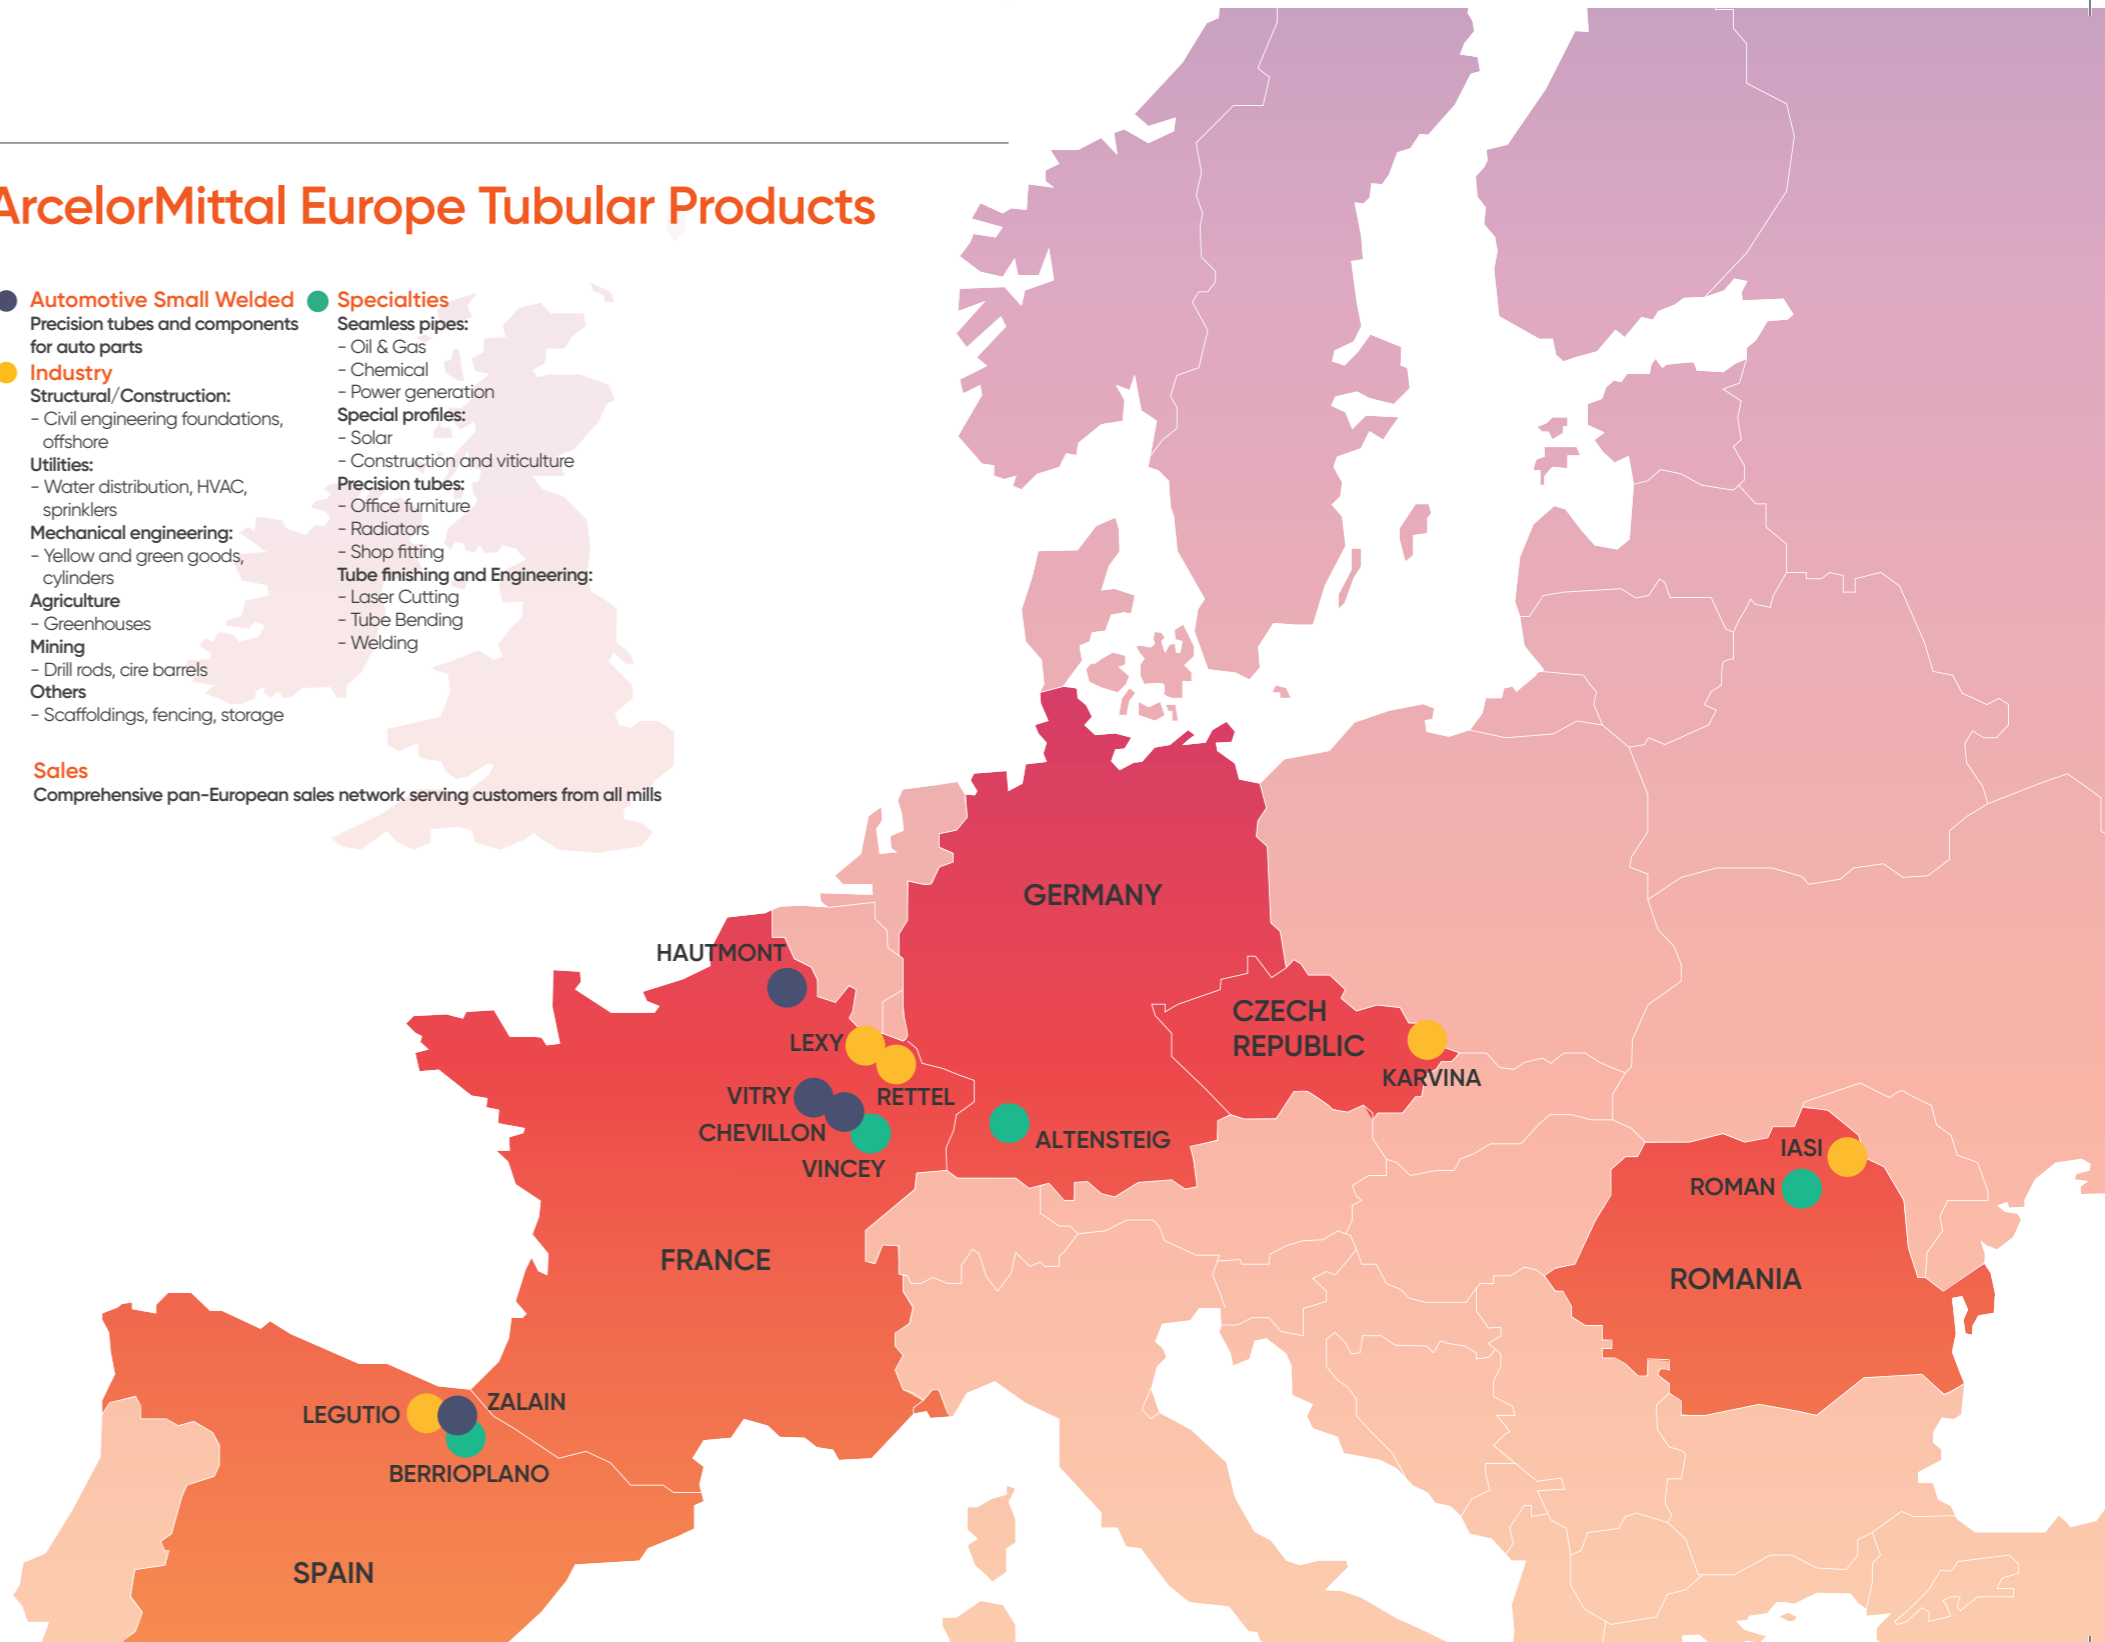

➡ ArcelorMittal Europe Tubular Products is one of the most diversified producers of pipes and tubes, servicing diverse markets including automotive, construction, engineering, and energy.

## ArcelorMittal Europe Tubular Products

- **Automotive Small Welded**  
Precision tubes and components for auto parts
- **Industry**  
Structural/Construction:  
- Civil engineering foundations, offshore  
Utilities:  
- Water distribution, HVAC, sprinklers  
Mechanical engineering:  
- Yellow and green goods, cylinders  
Agriculture  
- Greenhouses  
Mining  
- Drill rods, cire barrels  
Others  
- Scaffoldings, fencing, storage
- **Specialties**  
Seamless pipes:  
- Oil & Gas  
- Chemical  
- Power generation  
Special profiles:  
- Solar  
- Construction and viticulture  
Precision tubes:  
- Office furniture  
- Radiators  
- Shop fitting  
Tube finishing and Engineering:  
- Laser Cutting  
- Tube Bending  
- Welding

**Sales**  
Comprehensive pan-European sales network serving customers from all mills

# Applications

## Industry

### Main Applications

- Structural applications
- Hydraulic cylinders
- Mineral mining equipment
- Heavy construction equipment
- Scaffolding and fencing
- Farm machinery equipment
- Storage systems
- Furniture

## Automotive

### Main Applications

- Shock absorbers
- Chassis/suspension
- Crash components
- Seats
- Stabilizer bars
- IP beams
- Steering columns
- Body in white

## Specialties

### Main Applications

- Oil & Gas, chemical, power generation
- Solar, construction and viticulture
- Office furniture, radiators, shop fitting
- Laser Cutting, tube bending and welding
