

ArcelorMittal Europe – Tubular Products

➔ ArcelorMittal Europe – Tubular Products is a pan-European producer and leading global supplier of pipes and tubes. With manufacturing operations in five countries, 13 strategically located production sites, and a robust distribution network, we deliver our comprehensive range of tubular products across Europe and major international markets. Active in many sectors like energy, construction, automotive, mechanical engineering, yellow and green goods, and agriculture, we offer an extensive portfolio of tubular solutions that cover the full spectrum of customer needs. ArcelorMittal Europe Tubular Products stands at the forefront of the industry, offering one of the widest ranges of steel solutions available. Our product range includes seamless and small welded tubes (including precision and CDW), complemented by various processes and finishing options such as ERW, HFI, galvanized, coated laser cutting, and tube bending.

Climate Action Plan

➔ Our journey towards becoming carbon neutral by 2050 is well underway. In line with the Paris Climate Goals and the European Green Deal, ArcelorMittal has also committed to reduce CO2 emissions in our European operations by 35% by 2030. As Europe's largest steelmaker, ArcelorMittal has a significant role to play in enhancing the sustainability of our industry. Our decarbonisation strategy has three main levers: Circular steel, Innovative Direct Reduced Iron (DRI), and Smart Carbon steelmaking. There are projects underway for all three of these levers to ensure we achieve our goals on schedule. In 2021, we launched XCarb®. This initiative groups together all of ArcelorMittal's low carbon steelmaking activities, projects and products. Our industry-first XCarb® green steel certificates allow customers to reduce their Scope 3 emissions, and are the result of decarbonisation efforts in our blast furnace operations. XCarb® recycled and renewably produced is applied to steels produced in ArcelorMittal's electric arc furnaces (EAFs) with 100% renewable electricity and up to 100% scrap content.

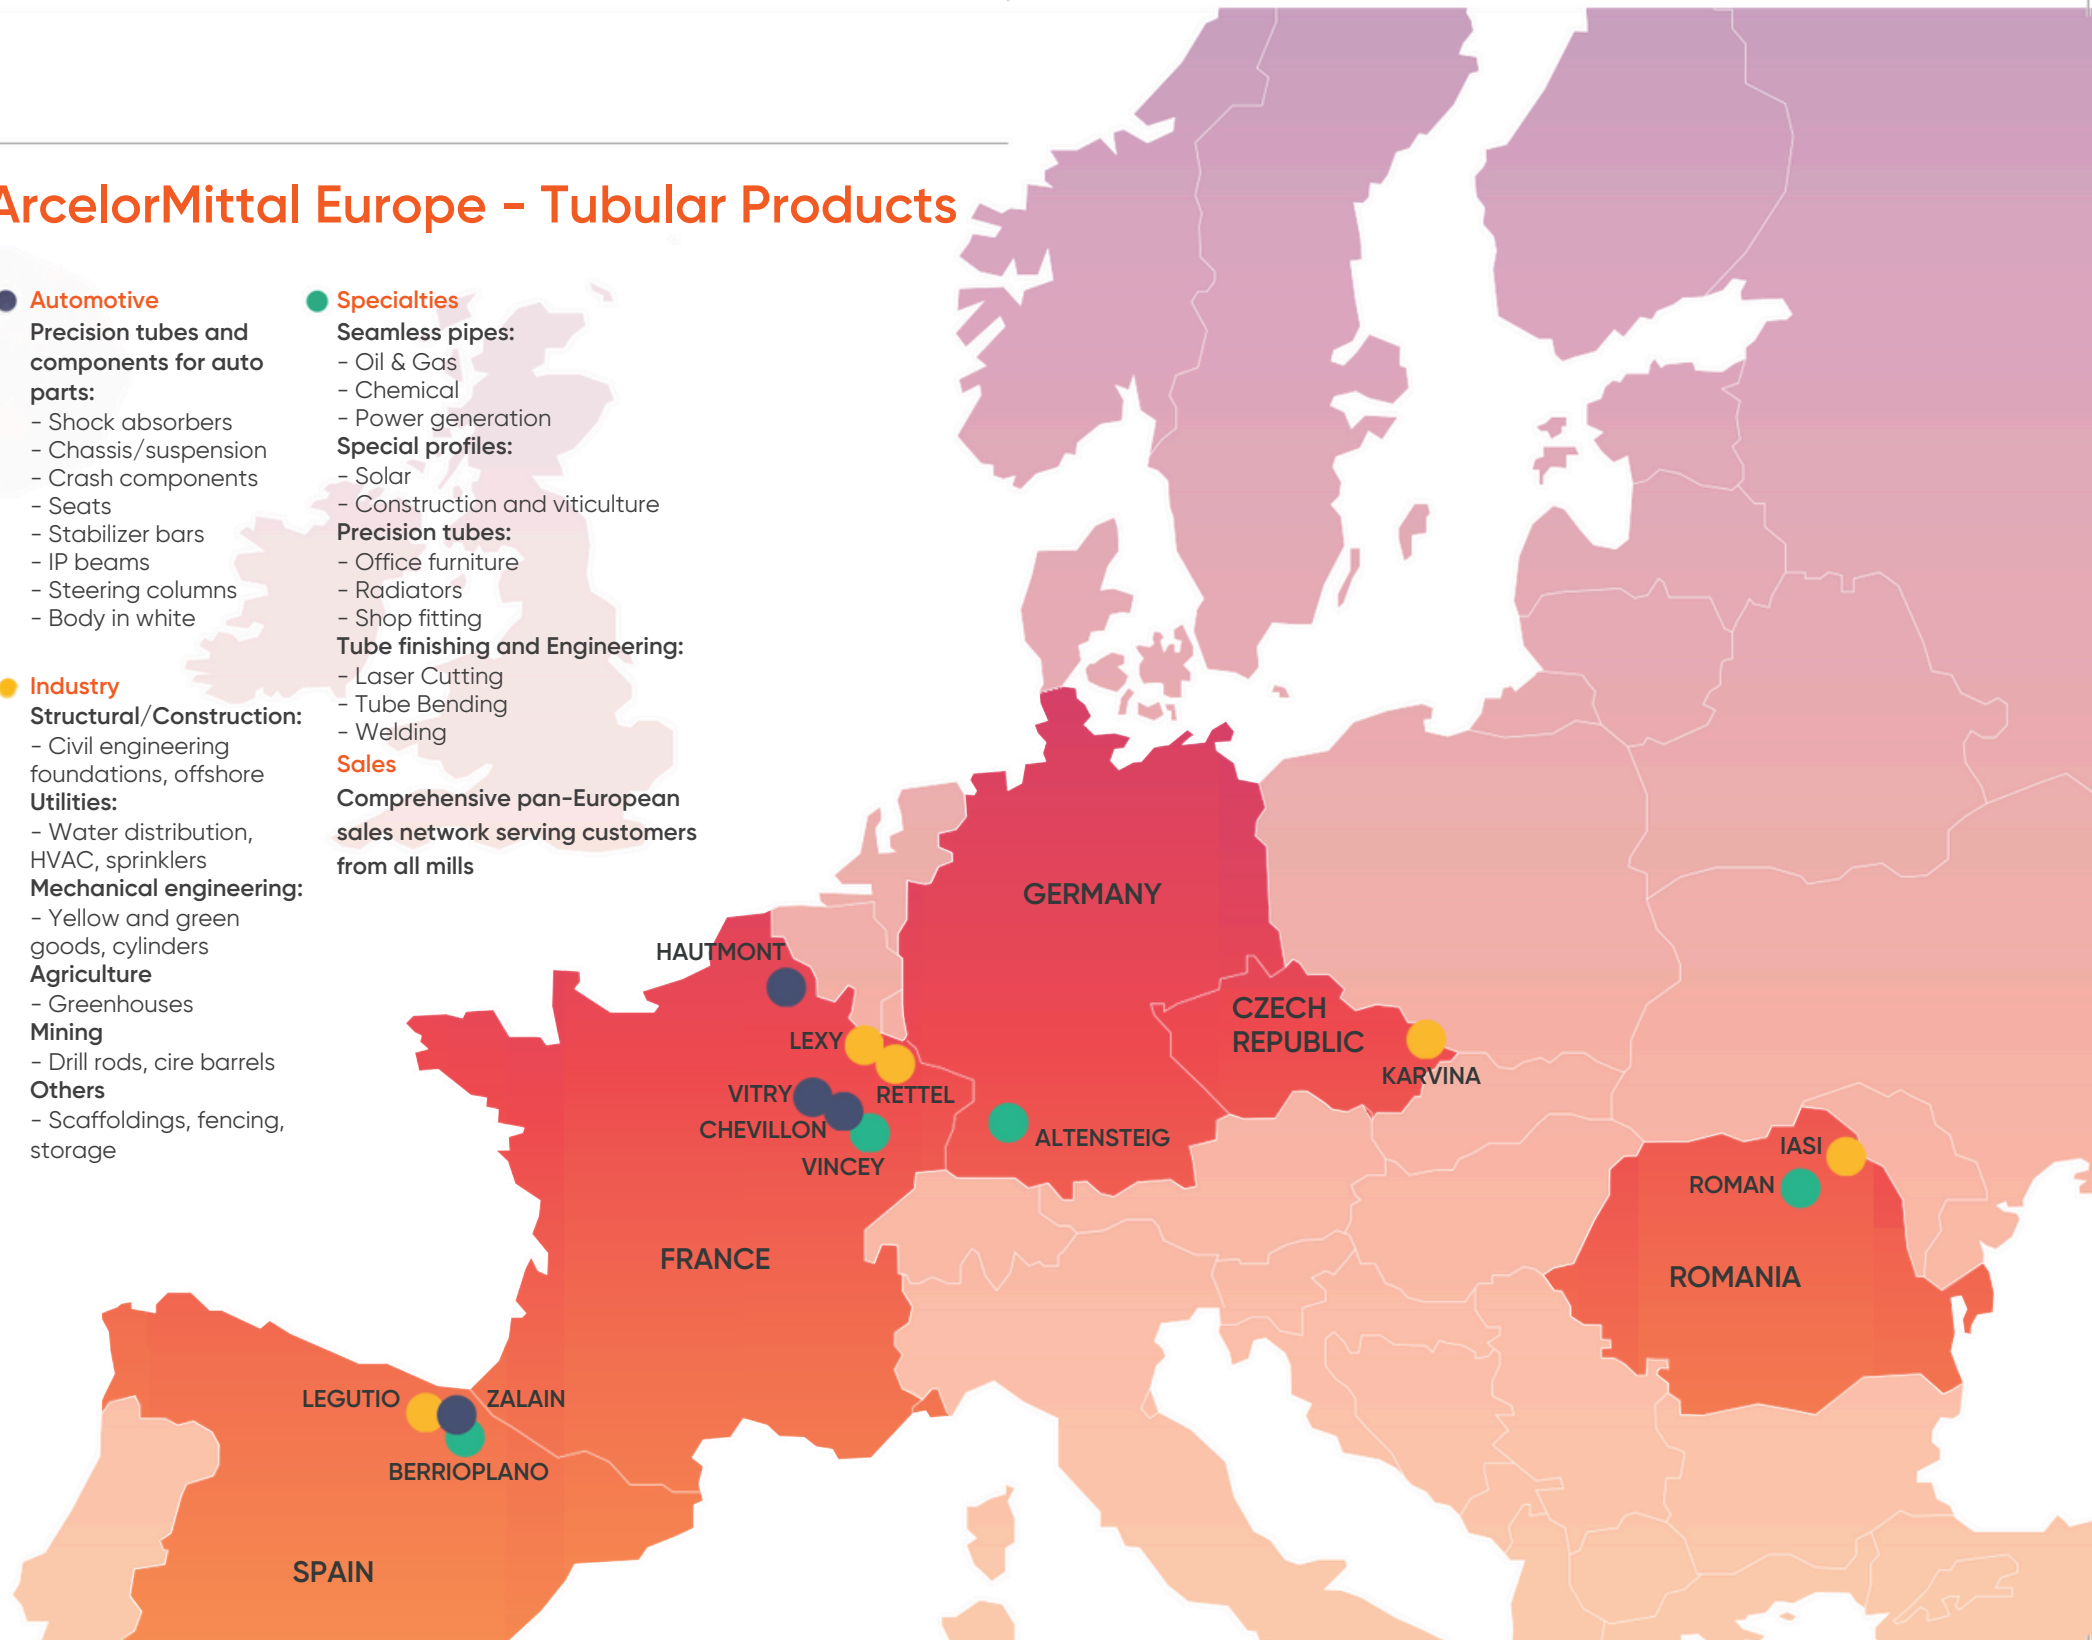

➔ ArcelorMittal Europe Tubular Products is one of the most diversified producers of pipes and tubes, servicing diverse markets including automotive, construction, engineering, and energy.

ArcelorMittal Europe – Tubular Products

- **Automotive**
Precision tubes and components for auto parts:
 - Shock absorbers
 - Chassis/suspension
 - Crash components
 - Seats
 - Stabilizer bars
 - IP beams
 - Steering columns
 - Body in white
- **Specialties**
Seamless pipes:
 - Oil & Gas
 - Chemical
 - Power generation**Special profiles:**
 - Solar
 - Construction and viticulture**Precision tubes:**
 - Office furniture
 - Radiators
 - Shop fitting**Tube finishing and Engineering:**
 - Laser Cutting
 - Tube Bending
 - Welding
- **Industry**
Structural/Construction:
 - Civil engineering foundations, offshore**Utilities:**
 - Water distribution, HVAC, sprinklers**Mechanical engineering:**
 - Yellow and green goods, cylinders**Agriculture**
 - Greenhouses**Mining**
 - Drill rods, cire barrels**Others**
 - Scaffoldings, fencing, storage

Sales
 Comprehensive pan-European sales network serving customers from all mills
