

ArcelorMittal Europe – Tubular Products

TODAY

Edition 1
March 2025

Innovations and achievements 2024

We are pleased to present the first edition of our ArcelorMittal Europe – Tubular Products newsletter. This issue reflects on 2024—a year marked by significant achievements and strategic initiatives. Despite a challenging market environment, our unwavering commitment to innovation, quality, and sustainability has driven us forward.

Over the past year, we launched our new website, collaborated on cutting-edge projects, secured key certifications, and introduced breakthrough products that enhance our competitive edge in the global steel tube industry. Our participation at major industry events and our strategic partnerships have reinforced our commitment to advancing innovation and sustainable practices.

As we look ahead to 2025, we remain dedicated to delivering value, advancing sustainable practices, and meeting the evolving needs of our customers. We are grateful for your continued trust and partnership, which inspires us to push the boundaries of excellence every day.

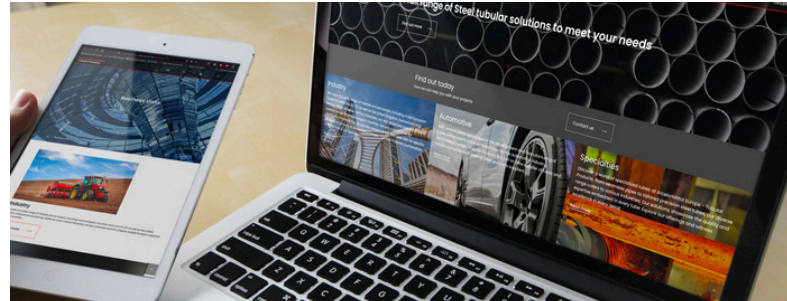

Thank you for being an integral part of our journey. We look forward to another successful year together.

Sincerely,
ArcelorMittal Europe – Tubular Products Communication

A Year of Innovation and Progress

Revamp of ArcelorMittal Europe - Tubular Products Website

Our new website offers a fresh, user-friendly experience with improved navigation, detailed product information, and easy access to resources. This upgrade enhances how we connect with customers, offering a streamlined platform to explore our solutions. Explore it at tubular.arcelormittal.com.

JÄKL's Warehouse Automation Project with VŠB-TUO

ArcelorMittal Tubular Products Karviná collaborated with VŠB – Technical University of Ostrava on an innovative project aimed at enhancing storage efficiency and material handling. This cutting-edge system, integrating advanced tracking and automation, has improved shipping times, loading preparation, and workplace safety.

Showcasing our solutions at the Tube Fair 2024

At this leading event in Düsseldorf, we showcased advanced tubular solutions at Tube Fair 2024, highlighting our expertise in delivering high-quality products for diverse industries. The event served as a platform to engage with customers and industry partners, sharing insights into our sustainable and innovative offerings.

Release of the Sustainability Report 2023

Our 2023 Sustainability Report outlines our progress in reducing environmental impact and advancing responsible manufacturing practices, with clear data on emissions reduction and resource efficiency. You can download it [here](#).

XCarb® Precision Steel Tubes Now Available at SRW

Our site in Altensteig now offers XCarb® precision steel tubes, advancing our sustainability efforts. This low-carbon solution continues to reflect our dedication to minimizing emissions while maintaining high product performance.

New Laser-Cutting Machine in Axame

The installation of the ADIGE LT7 laser-cutting machine at ArcelorMittal Tubular Products Axame enhanced our cutting precision and flexibility. This advanced equipment has doubled our production capacity and supports industries such as construction and renewable energy by offering tailored solutions with faster delivery times.

EPDs Available for HSS, Welded, and Seamless Steel Pipes

We now offer Environmental Product Declarations (EPDs) for Hollow Structural Sections (HSS), welded, and seamless steel pipes. These verified documents provide transparent insights into the environmental impact of our products, supporting sustainable construction and manufacturing practices.

Download them [here](#).

Hydrogen-ready certification at Roman

Last year, our Roman production site achieved Bureau Veritas certification for hydrogen-ready seamless pipes. This milestone underscores our readiness to support the energy transition with solutions capable of handling 100% hydrogen, contributing to a sustainable future.

Launch of TubeUser

TubeUser, our innovative platform designed to transform how customers can track and manage orders. With enhanced real-time tracking and streamlined communication, it's a leap forward in customer service and operational efficiency.

Innovation in High-Strength DP980DH Steel

We introduced a new tubular automotive component made from high-strength DP980DH steel. This innovation offers a 10% weight reduction compared to previous designs while maintaining performance, helping manufacturers meet efficiency and sustainability goals.

FuelGae Project: Contributing to a Sustainable Future

Our Roman production site is providing crucial expertise in steel production and CO2 emissions data, while also hosting a pilot site for photobioreactor technology as a contributor of the FuelGae consortium. You can learn more about the initiative and watch the video [here](#).

DAVID ROL Partners with ArcelorMittal for a Sustainable Future

Based in Saint-Étienne, France, and committed to reducing its carbon footprint, DAVID ROL recently placed its first order of XCarb® low-carbon emission steel tubes. This partnership was made possible through close collaboration between Distribution Solutions France and ArcelorMittal Tubular Products Legutio.

For more information check out the [article in our website](#).

What's Next...

As we continue our journey of innovation and progress, here's a look at what's coming up:

Explore Our Tubular Solutions at Bauma 2025

ArcelorMittal Europe – Tubular Products will showcase high-performance steel tube solutions at bauma 2025 in Munich, Germany, the world's leading trade fair for construction and mining machinery. Visit us at **Hall 6, Stand 518** to explore our latest advancements in tubular solutions designed for strength, durability, and sustainability. For more details and ticket information, please visit our [website](#)

Join us at
bauma 2025

April 7 - 13th
Munich, Germany
Hall A6, Stand 518

Sustainability Report 2024: Our Continued Commitment

Building on the progress outlined in our 2023 Sustainability Report, we are preparing to release our 2024 edition. It will highlight key developments in our journey toward lower-carbon steel production, enhanced safety practices, and our ongoing efforts to support a more sustainable future.
